

Scalable Display Technologies and vislogix Demonstrate at InfoComm09

June 12, 2009

Cambridge, MA -- Scalable Display Technologies, the leader in auto-calibration software for multi-projector displays and vislogix are pleased announce a joint demonstration at InfoComm09.

Vislogix (booth 2378) will demonstrate a two projector stack with two InFocus projectors on a 104" rear projection screen calibrated by Scalable's EasyBlend™.

"The vislogix VISTiqueHC has ideal characteristics for the digital signage application" said Andrew Jamison CEO Scalable Display. "Customers are looking for great uniformity for their rear-projected applications and VISTiqueHC delivers."

"We are delighted to be working on this particular exhibit with Scalable Display" said Oliver Ferrier, Co-Founder of vislogix. "Andrew and his highly skilled team have truly surpassed our expectations in every regard with their EasyBlend™ technology. This is going to be something special!"

Scalable will be demonstrating in Booth # 4788 and vislogix will be in booth #2378.

About Scalable Display

Scalable Display Technologies, Inc., located Cambridge, Massachusetts, is a leading provider of auto-calibration software used to create edge-blended displays. Our EasyBlend software simplifies the creation of super-resolution, multi-projector displays of highest quality and scalable size. EasyBlend opens the door to wide-spread use of multi-projector displays for a new class of simulators based on off the shelf components, as well as supporting new forms of digital signage and data visualization tools.
